

Maximum Torque Guide - Titanium in Nm/In-Lbs.

Disc Rotor Bolts: We recommend the use of a medium strength Thread-lock be used with Titanium Disc Rotor Bolts. We replicate the dimensions of manufacturer’s original parts and this often results in bolts with a low head profile, therefore a small and shallow drive. We recommend the use of a torque wrench to achieve an even purchase. We recommend you use torque values specified below:

For bolts with a 6mm Thread Diameter: 20Nm

For bolts with a 8mm Thread Diameter: 22Nm

For bolts with a 10mm Thread Diameter: 25Nm

Caliper bolts :

For bolts with a 8mm Thread Diameter: 22Nm

For bolts with a 10mm Thread Diameter: 25Nm

	Non-lubricated		Lubricated		
	Torque	Torque	Torque	Torque	
Bolt Size	Min.	Max.	Bolt Size	Min	Max.
M6-1.00	80 in-lbs	100 in-lbs	M6-1.00	72 in-lbs	90 in-lbs
M8-1.25	120 in-lbs	145 in-lbs	M8-1.25	108 in-lbs	130 in-lbs
M10-1.25	200 in-lbs	255 in-lbs	M10-1.25	180 in-lbs	230 in-lbs
